

Education

Boston, MA	Boston College	Fall 2021 – May 2025
• B.A. in Computer Science, B.A. in Philosophy. GPA: 3.7 Cum Laude. • Relevant Coursework: Machine Learning, Operating Systems, Computer Networks, Algorithms. • SAT: 1540 (99th percentile, perfect 800 Math)		

Employment

Software Engineer @ Microsoft		Fall 2025-Present
SWE Intern	Microsoft Corporation	Summer 2024
• Engineered a Copilot plugin automating ~70 daily support tickets (~\$75 per manual review). C#, Cosmos • Utilized prompt engineering and vector embeddings to optimize queries and enhance user experience. • Integrated APIs to leverage the Semantic Kernel to build an orchestrated AI agent system.		
Explore SWE Intern	Microsoft Corporation	Summer 2023
• Spearheaded a UX improvement project within Cloud + AI, enhancing a B2B SaaS marketplace page. • Developed list and card product views, improved filtering, and standardized components for enhanced accessibility. HTML/CSS/TS, React, C#. • Streamlined data processing and presentation, prioritizing a customer-centric approach to boost page speed and readability.		
New Technologist Intern	Cyborg Mobile at Microsoft	Summer 2022
• 1 of 100 selected from 2,000+ applicants worldwide to be a New Technologist. • Collaborated with a team of six using agile methodology to develop a goal-sharing social media platform designed for college students. HTML/CSS/JS, React, Fluent UI.		
Researcher	Brain Health Alliance	Spring 2021 - Fall 2021
• Researched and published (IEEE) a bibliographic format convention with 26% greater read-write speed. • Developed a bibliographic format converter with an import/export feature for use with L^AT_EX. C#.		

Projects

-
- **Short-Term Financial Market Prediction using Machine Learning.** Achieved **63% accuracy** in predicting short-term stock market performance by fitting a **random forest** and an **AdaBoost boosted decision stumps** model to selected stock indicators. **Python, Sklearn, Pandas, Matplotlib**
 - **College Marketplace, IOS App.** Boston College themed marketplace where each user can post images and descriptions of their products, and view other users' products. Supports Google authentication and email login. **Swift, Firebase**

Additional Experience and Awards

-
- **President, The Philosophical Society:** Leading weekly discussions on a variety of philosophical topics.
 - **Language:** Spanish (native), English (native), French (proficient), **Nepali** (conversational).
 - **Honors:** *The Rochester Computing Medal and Scholarship Program, Computer Science Underclassmen Award.*
 - **Interests:** Powerlifting, philosophy, mixed martial arts, nature, dogs and anime.

Languages and Technologies

-
- Python, TS/CSS/HTML, C#, Azure, React, Swift, Java, C, C++, Rust, Node, Linux, Firebase.
