Education

	Georgia Institute of Technology	2026 – Present
M.S. in Computer Science, Machine Learning specialization. GPA: 4.0. Coursework: Machine Learning, Deep Learning.		
Boston, MA	Boston College	Fall 2021 – May 2025
B.A. in Computer Science, B.A. in Philosophy. GPA: 3.7, Cum Laude. 800 Perfect Math SAT.		

Employment

Software Engineer	Microsoft Corporation	Fall 2025 – Present
- Built production AI-driven pipelines for an LLM-powered AI agent, automating large-scale data generation and retrieval for enterprise partners. C#, Azure. - Established ML evaluation and monitoring practices — observability, feedback loops, and iterative improvement for AI system reliability.		
SWE Intern	Microsoft Corporation	Summer 2024
- Engineered an LLM-powered classifier automating triage of ~70 daily incidents (~\$75 per manual review). C#, Cosmos DB. - Applied RAG, prompt engineering, and vector embeddings to build a context-aware knowledge retrieval system. - Integrated the Semantic Kernel to orchestrate a multi-agent AI system for end-to-end automated workflows.		
New Technologist Intern	Cyborg Mobile at Microsoft	Summer 2022
1 of 100 selected from 2,000+ applicants worldwide to be a New Technologist.		
Researcher	Brain Health Alliance	Spring 2021 – Fall 2021
Researched and published (IEEE) a bibliographic format convention achieving 26% greater read-write speed. C#.		

Projects

Benchmarking Supervised Learning Algorithms. Comparative analysis of DT, kNN, SVM, and Neural Networks on two classification tasks (45K+ samples). Implemented custom PyTorch MLP architectures; optimized hyperparameters with Optuna. Python, PyTorch, Scikit-learn. ML-Based Pattern Detection in Financial Time Series. Trained random forest and AdaBoost ensemble models to classify directional patterns in stock data, achieving 63% accuracy across selected indicators. Python, Scikit-learn, Pandas.		
--	--	--

Additional Experience and Awards

President, The Philosophical Society: Led weekly analytical discussions; honed communication of complex ideas. Languages: Spanish (native), English (native), French (proficient), Nepali (conversational). Honors: <i>The Rochester Computing Medal and Scholarship Program, Computer Science Underclassmen Award.</i>		
--	--	--

Languages and Technologies

Languages: Python, C#, Java, TypeScript, C/C++, Rust, SQL. ML / AI: PyTorch, Scikit-learn, Pandas, NumPy, RAG, Prompt Engineering, Optuna, Semantic Kernel, Vector Embeddings. Infrastructure: Azure, .NET, Cosmos DB, Linux, Git, REST APIs.
